MEC Professional

Mec Professional is the complete linear lighting system that allows to compose, in total autonomy, the most suitable lamps for your needs: **easy-to-install system**.

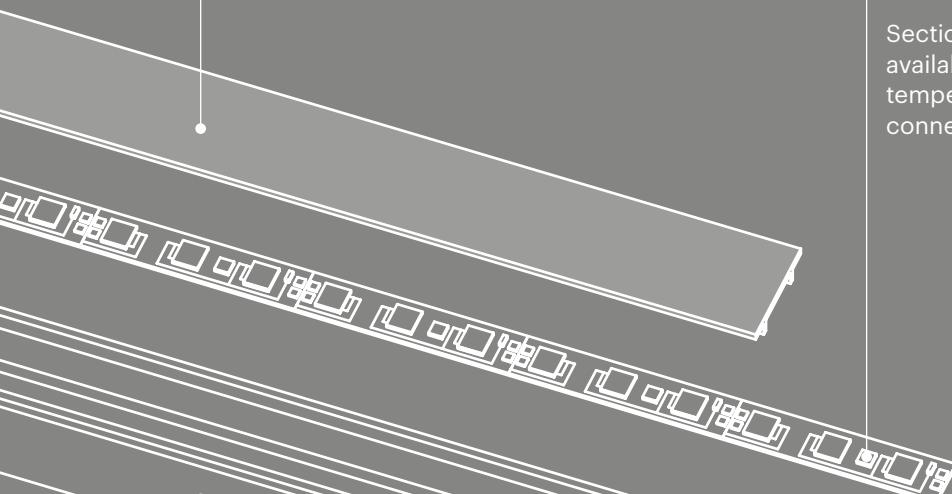

It is possible to create a completely customized luminaire by combining profiles and screens with **high efficiency LED light sources**, power supply systems and remote control accessories.

The lamps are easily electrified by means of special bridge connectors that **do not require any welding operation, simplifying the work and reducing material waste**.

Easy-to-install System

Screen cover

Cutable to size polycarbonate screen covers, with specific design for each profile and available, according to the models, in opal, transparent or dark grey finishes.

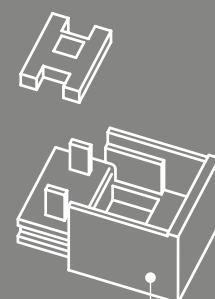

Profile

Cutable to size anodized aluminum profiles, available in various shapes, sizes and finishes in surface or recessed mounting versions.

LED light source

Sectionable 12 or 24V adhesive LED Reels, available in various widths and color temperatures. Compatible for Reel to Reel connection cables and switching systems.

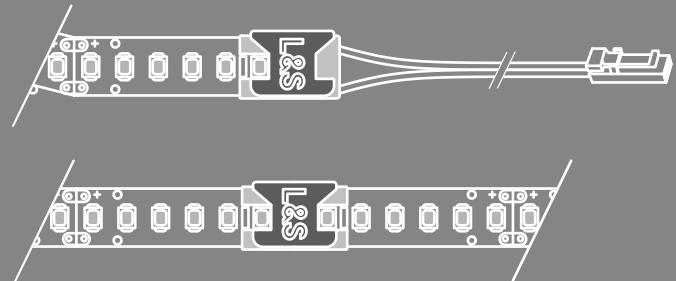

Accessories

End caps, cable clamps, fixing clips and brackets

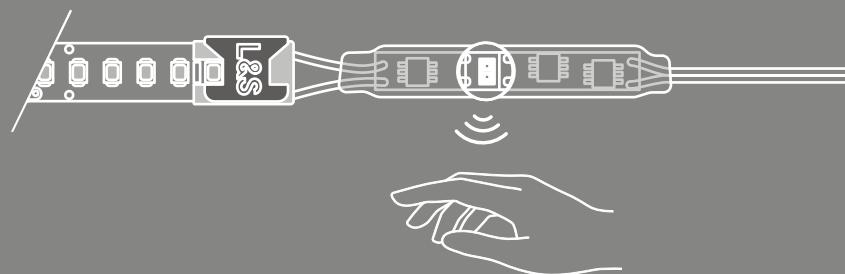

Reel to Reel connections

For power cables, extension cords and integrated switching systems: a practical and intuitive solution that simplifies lamp preparation.

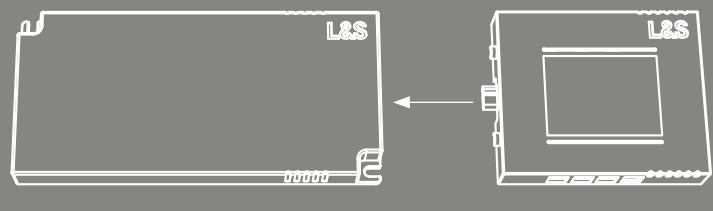

Integrated switching systems

Sensors and switches for Reel to Reel connection to LED Light Sources: to be inserted directly into the profiles to control switching, light intensity and color temperature regulation

MEC Driver

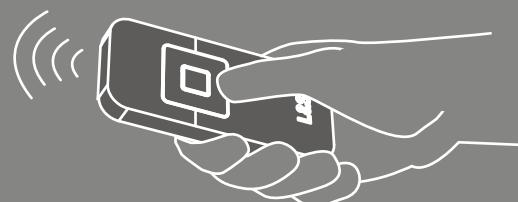

Patented multi-voltage power supply system, certified for almost all world markets. Modular design, with the possibility of integrating various SMART distribution and control modules in a simple and intuitive way, for remote regulation of every aspect of lighting, sound and home automation.

V IN: 100-240V (V OUT: 12-24V)

SMART sensors and controllers

Solutions for remote control of LED lamps in combination with SMART Control Modules: wireless sensors and controllers to customize every aspect of the light, such as switching, light intensity and color temperature regulation.

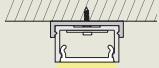

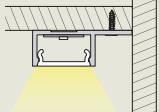

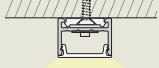

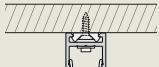

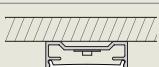

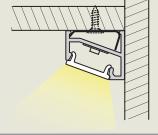

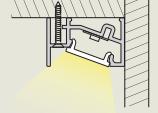

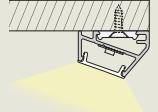

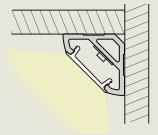

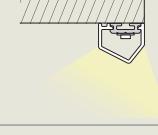

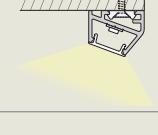

Selection Guide

Few simple steps to easily create, in total autonomy, a fully customized lamp.

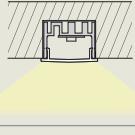

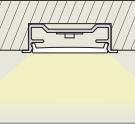

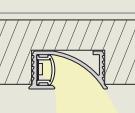

1.1 Surface mounting profiles

High efficiency

More light output, less energy input

The new generation of 24V LED strips, bringing a higher efficiency, integrated in all our solutions.

2 LED Light Sources

A wide choice of LED Reels, to easily create lighting systems suitable for every need: cuttable to size, practical and easy to use by means of Reel to Reel connection cables (no welding operations required).

Compatible with integrated switching systems, also equipped with Reel to Reel connectors, for on-off switching, light intensity control and Color Temperature regulation.

Available in MONO, EDC (Dual Color Temperature 3000K/4000K settable by means of integrated switching systems, remote controllers or EDC Jumper cable) and EMOTIONversions (adjustable Color Temperature from 2700K to 6500K with integrated switching system or remote controllers)

Strip LED 4mm

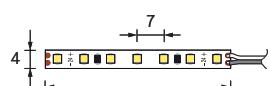

(24 V)

PRE-CUT ADHESIVE
LED STRIPS

Cut to size adhesive LED Strip complete with power cable (double power cable for the 5000mm cuttable LED Reel)

3 MEC Driver

The patented LED power supply system, certified for almost all world markets.

Modular design to create endless solutions by yourself, with the possibility of integrating various control modules in a simple and intuitive way, for remote regulation of every aspect of lighting, sound and home automation.

MEC Driver system

Power supply module

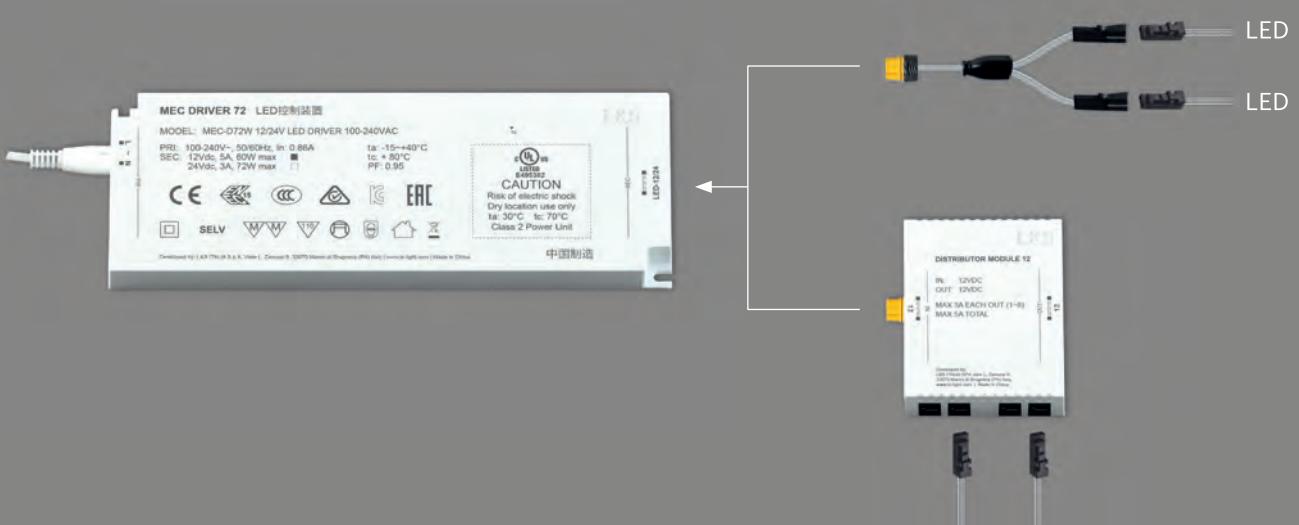

The heart of the system, a power supply module with an input voltage of 100-240 V AC, for use on a global scale. Connection to 12-24V LED lamps via distribution and control modules

V IN: 100-240V

Distribution modules

Direct lamps connection to Mec Driver via splitter cable (2 ways out) connection box or distributor module (6 or 8 ways out). For lamps with or without integrated switching system.

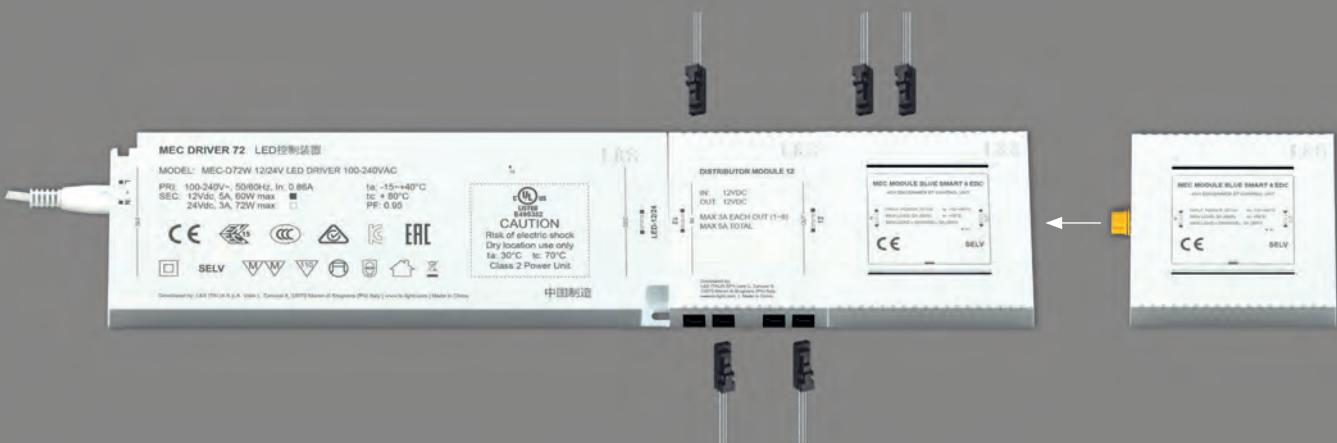

SMART Control modules

Lamps connection with different control modules. Light management via remote controls and external sensors (Smart Remote), mobile phone (Bluetooth), wired IR/PIR sensors or voice commands (Amazon - Google). For lamps without integrated switching system.

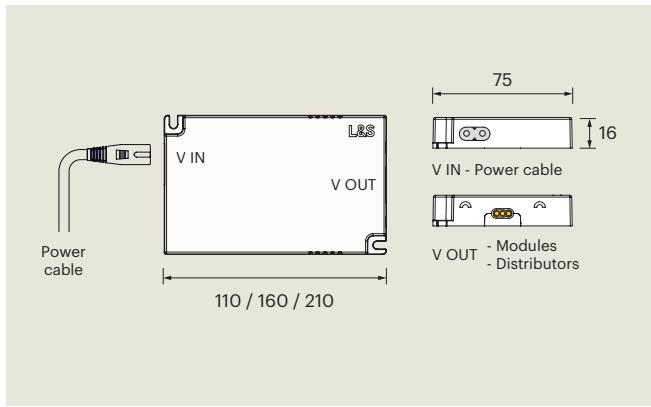

Modular design

Modules can be connected to other control or distribution modules as long as the same voltage (12V or 24V) is maintained. The maximum connectable load depends on the power (W) supplied by the driver.

MEC Driver

POWER SUPPLY MODULE

POWER SUPPLY MODULE FOR LED LAMPS

V IN: 100-240V (V OUT: 12-24V)

Patented LED power supply system, certified for almost all world markets. Connection to 12-24V LED lamps via distribution and control modules: modular design to create endless solutions by yourself, with the possibility of integrating various modules in a simple and intuitive way.

Choose the correct power cable (sold separately) according to the type of plug suitable for your reference market.

MOBILE APP

 APP FOR
CONTROL MODULES

**DEVICE SETTING**

Displays the connected devices divided into zones

**SWITCH MODE**

Select, switch on or off individual zones

**DIMMER MODE**

Adjust the light intensity of each individual lamp

**SCENARIO MODE**

Up to 4 different scenarios with custom settings

**WHITE MODE (EDC)**

Color temperature selection for each individual lamp

**RGB MODE (RGB VERSION)**

Color tone selection for each individual lamp

COMPATIBLE WITH BLUESMART MODULES (P.108) - FREE DOWNLOAD

SMARTY VOICE

8 WAYS MODULE

RADIO FREQUENCY AND VOCAL CONTROL MODULE

ON-OFF / Dimmer / Color Temperature (EDC)

Up to 8 lamps simultaneous control via voice commands with Amazon Alexa and Google Home devices; compatible with Smart sensors and controllers. Available in 12V or 24V versions: can be connected to other control or distribution modules as long as the same voltage is maintained.

WAYS	MAX LOAD	V IN	LED	CODE
8	5A Total 3A Single way	12V DC	MONO	24201810100
			EDC	24201820100
	24V DC	MONO	24201830100	
			EDC	24201840100

SMARTY HCL

8 WAYS MODULE

RADIO FREQUENCY AND VOCAL HCL CONTROL MODULE

ON-OFF / Dimmer / Color Temperature / HCL Settings

Dedicated to the biological and emotional aspects of light: up to 8 lamps simultaneous control with dedicated app, to choose the colour temperature based on the environment or reproduce the cycle of sunlight and follow the circadian rhythm. Compatible with Smart sensors and controllers and via voice commands with Amazon Alexa and Google Home devices.

WAYS	MAX LOAD	V IN	LED	CODE
8	5A Total 3A Single way	24V DC	EMOTION	24202610100

Can be connected to other control or distribution modules as long as the same voltage (24V DC) is maintained.

WIRED C 4 WAYS MODULE

 CONTROL MODULES

CE

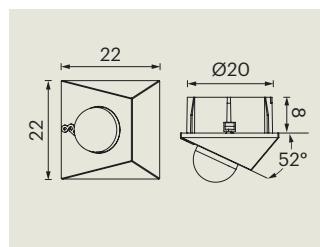

CONTROL MODULE WITH WIRED SENSORS
ON-OFF / Dimmer

Up to 4 lamps simultaneous control; compatible with cabled IR, PIR and TOUCH sensors, sold separately (max. 2 sensors per module); available in 12V or 24V versions: can be connected to other control or distribution modules as long as the same voltage is maintained.

Sensors are supplied as standard with 700mm cable (3000mm cable sold separately)

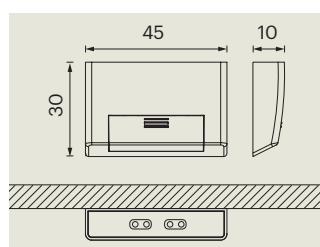

WAYS	MAX LOAD	V IN	LED	CODE
4	5A Total 3A Single way	12V DC 24V DC	MONO MONO	24203170100 24203210100

EXTRA SENSOR CABLE	CODE
3000mm	12608841000

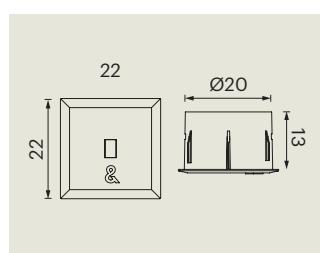

PIR SENSOR	CODE
Motion sensor for recessed mounting. Switch-off time (16 or 180 seconds, starting from last detection) selectable on the WIRED-C module. Memory of setting also in case of a power failure	24203191000

Hole: Ø20mm

IR DOOR WEDGE	CODE
Handy, small-sized door contact sensor for surface mounting; its 2 IR detectors on board make it ideal for two-door cabinets	24203181000

Cable hole: Ø8mm

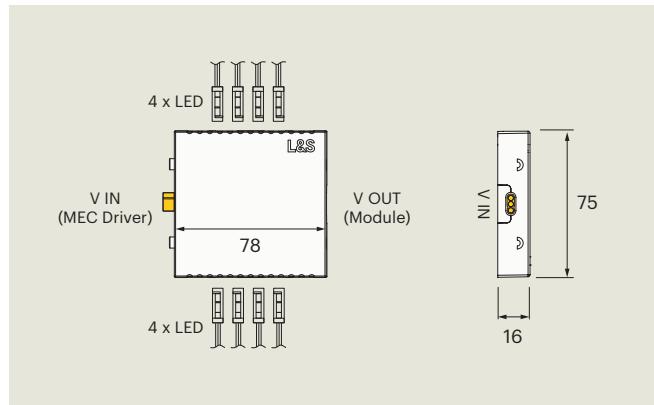

TOUCH SENSOR	CODE
Touch switch for recessed mounting. Long touch for a stepless dimming (10%-100%). Memory of setting also in case of a power failure	24203201000

Hole: Ø20mm

KINETIC

8 WAYS MODULE

 CONTROL MODULES

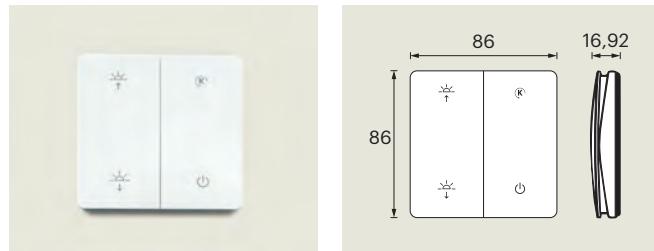

RADIO FREQUENCY CONTROL MODULE
ON-OFF / Dimmer / Color Temperature

Up to 8 lamps simultaneous control with dedicated remote, sold separately; available in 24V version: can be connected to other control or distribution modules as long as the same voltage is maintained.

The piezoelectric technology EDC Radio remote control works without battery, avoiding any type of maintenance.

WAYS	MAX LOAD	V IN	LED	CODE
8	5A Total 3A Single way	24V DC	EDC	24202510100

SMART MUSIC

AUDIO MODULE

  AUDIO PLAYBACK MODULE

BLUETOOTH AUDIO PLAYBACK MODULE

The Smart Music module allows you to reproduce the audio signal of your smartphone through the excitors, active speakers that, applied inside furniture or behind mirrors, transform surfaces into acoustic diffusers, thus creating an invisible sound system. Available as a kit with one or two speakers (two speakers are recommended for surfaces larger than 3 m²). Can be connected to other control or distribution modules as long as the same voltage (24V) is maintained.

V IN	OUTPUT	CODE
24V DC	1x SPEAKER 8W (15W consumption)	24601810100
	2x SPEAKER 8W (15W + 15W consumption)	24601820100

ACTIVE SPEAKER

4 Smart-home ready

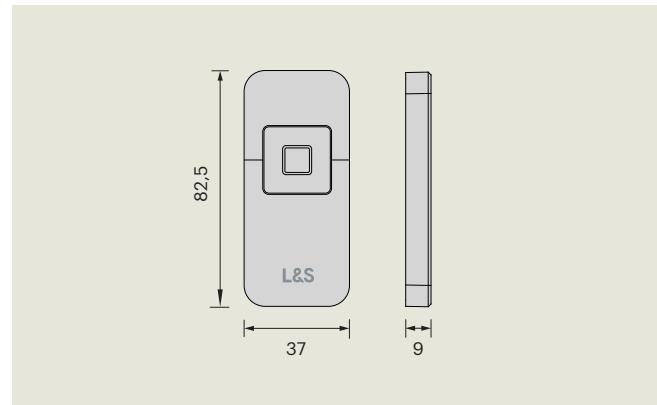

Functional solutions for remote control of all the LED lamps connected to SMART Control modules.

A wide range of wireless sensors and controllers, to customize every aspect of the light by controlling switch on-off, light intensity and Color Temperature (EDC versions for EDC Dual Color and EMOTION light sources)

SMART UP 1

CONTROLLER

 SENSORS AND
CONTROLLERS

TOUCH BATTERY OPERATED RADIO REMOTE CONTROL
 MONO/EDC - Range: 20m (indoor)

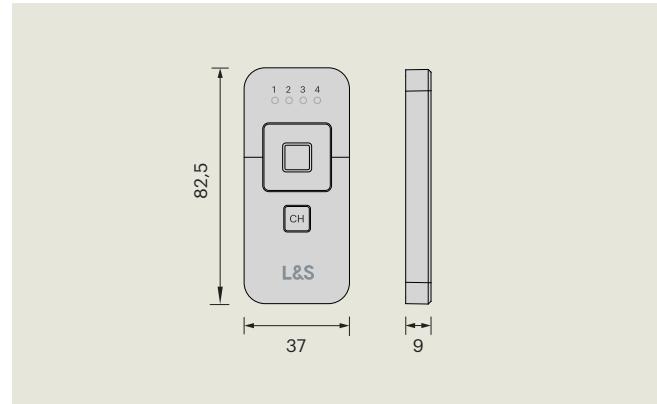

1 channel radio remote, for simultaneous control of all the lamps connected to compatible Smart control modules (up to 6 modules).

CHANNELS / LED	CONTROLS	CODE

SMART GHOST

DOOR SENSOR

 SENSORS AND CONTROLLERS

BATTERY OPERATED WIRELESS DOOR SENSOR
MONO - Range: 20m (indoor)

1 channel sensor for recessed installation on furniture doors: ON-switching of all connected lamps at door opening, OFF-switching at door closing by means of a magnetic contact (without contact time activation is adjustable). Simultaneous control of all the lamps connected to compatible Smart control modules (up to 6 modules)
