

RL-STEP-09 Stair Controller Parameters

Product Name
Dynamic Staircase Controller

Model Number
RL-STEP-09

Input Voltage
DC12V-24V

Max Current
10 A

Materials
ABS

Application
Control Stair LED Strips

Function
Adjust Mode / Brightness / Delay Time / Speed

Max Load
DC12V/120W DC24V/240W

Installation Diagram

2 PCS
Sensor Cable Length:1M

1 PCS
Extension Cord Length:5M

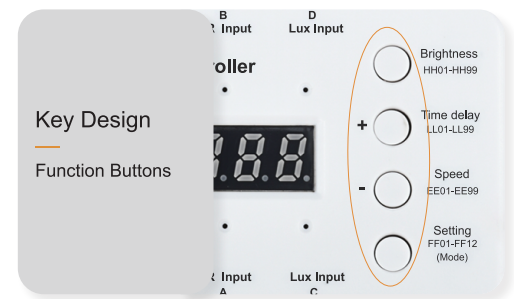

1 PCS
Daylight Sensor Length:1M

Product Details

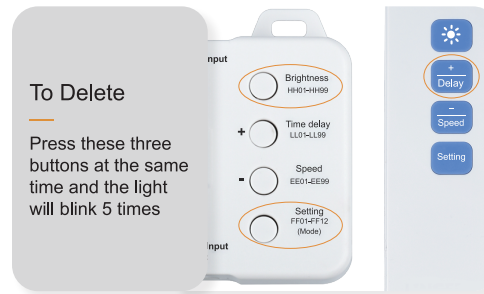

Interface Design
Power Cord Interface

Key Design
Function Buttons

Match Remote Control

To Delete

Press these three buttons at the same time and the light will blink 5 times

To Match

press these three buttons at the same time and the light will blink 3 times

Daylight Sensor

Daylight Sensor OFF
PIR Sensor Work Both Day And Night

Daylight Sensor ON
6 Levels Lux Setting

The Daylight sensor does not need to be placed visibly near the steps, but it should be able to detect light and dusk.

The sensor has 7 indicator lights. When you switch off the sensor by pressing the button (the control light at 'OFF' will turn blue), the lighting will be switched on in the daytime as well as in the evening.

When you press the button again, you switch the sensor on to the desired setting.

1x Press	the sensor is switched off	5x Press	50 Lux
2x Press	5 Lux - the sensor will switch on when it is quite dark	6x Press	100 Lux
3x Press	15 Lux	7x Press	150 Lux - the sensor will switch on when it is light
4x Press	30 Lux		

How To Use

1. Brightness

Brightness have 99 levels,short press to add 1 level brightness
Digital Display : HH01-HH9

HH01	2% Brightness
HH02	3% Brightness
HH03	4% Brightness
HH99	100% Brightness

2. Time delay

Time delay have 99 levels,short press to add 1 level time delay
Digital Display : LL01-LL99

LL01	4S
LL02	6S
LL03	8S
LL99	200S

3. Speed

Speed have 99 levels, short press to adjust speed
Digital Display : EE01-EE99

EE01	150ms Fastest Speed
EE02	175ms
EE03	200ms
EE99	2600ms Slowest Speed

4. Setting

Long press"Setting"to set Step Numbers,Brightness,Time Delay,Speed,Mode

Short press to"Setting"to enter next setting

After finished all setting,long press"Setting"to save all setting

A.Step Numbers

Digital display: 1C00 First floor

Use "+" "-" to adjust step numbers

B.Time delay

Use "+" "-" to adjust time delay

C.Speed

Use "+" "-" to adjust step speed

Please note"EE01" is fastest speed,"EE99" is slowest speed,if you want faster speed,press "-".If you want slower speed,press "+".

D.Mode

Use "+" "-" to choose mode

FF01	All steps on
FF02	All steps on one by one
FF03	All steps on with 2 steps at the time
FF04	All steps on with 3 steps at the time
FF05	1 step on, moving according to Speed setting
FF06	2 step on, moving according to Speed setting
FF07	3 step on, moving according to Speed setting
FF08	1 step phase, moving according to Speed setting
FF09	2 step phase, moving according to Speed setting
FF10	3 step phase, moving according to Speed setting
FF11	Separated phase, moving according to Speed setting
FF12	Auto change all modes 1-11

5. Sensor installation method
